

**TruXedo** previewed a new website set to launch 1/1/09. It has a new interactive product search and customer page. The new customer page gives customers all the information they need including technical tips, product information, pricing, images and much more. TruXedo's new website will also feature a new blog page and a video gallery on the home page!

TruXedo also launched four new products at the show.

TonneuMate Toolbox is TruXedo's new unique toolbox that is designed to mount at the front, middle or rear of the truck bed. It fits all full-size trucks and fits under all inside mount tonneau covers. It is completely lockable and its innovative elevated design also allows for use of the entire truck bed floor.

TonneuTruX is the first end only cargo rail and tonneau cover combination. It has a special rail design that integrates the cargo management tie down track into the tonneau cover rail system.

VentureSRS is their new sport rack system allowing customer to increase their cargo carrying capabili-

ties. The VentureSRS has a unique and stylish look and its innovative rail design allows for the system to work with most inside mount tonneau covers.

TruXedo is also now shipping the TruXedo® Lo Pro QT and Harley Davidson edition for the 2008-2009 Dodge Dakota with Track System as well as 2009 Ford F-Series applications for the Lo Pro QT, Lo Pro QT Harley-Davidson Edition, Deuce and TruXport.

The Lo Pro QT is also available in a Harley-Davidson edition, screen printed with the famous H-O Bar & Shield.

The TruXedo® Lo Pro QT's fast installation includes the quick attach spring-loaded header guide that holds the cover to the side rails and comes preassembled. Just pull the lever back and attach to the side rails. No bolts or tools required. Plus, the TruXedo Lo Pro QT features a lifetime warranty that covers everything – even the fabric!

TruXedo™ also distributes TruX-Seal™ tailgate seal and Pro-Tex™ soft tonneau protectant spray.

**DAMAR's** TruckDeck™ is a one-of-a-kind bed storage and organization accessory available for most popular pickup trucks. It is constructed of .080" aluminum diamond plate and features up to six lockable storage compartments, depending on bed length. Designed to fit the exact dimensions of the bed it is installed in, the TruckDeck's weather-resistant compartments are secured with stainless steel rotary T-handle latches and sealed with a neoprene rubber gasket. "Inside are removable polyethylene Load-N-Go containers with optional rear drawer-slide capability, which makes organizing your gear more convenient than ever," said David Martin, CEO, DAMAR Corporation LLC. "Fill the containers, lock them inside a

compartment and you're ready to go. It's perfect for working hard during the week, then swapping tools for sleeping bags and hiking necessities for the weekend."

It holds 1,000-lbs. distributed load capacity on its recessed CargoDeck, and can be used as a hauling surface to maximize the bed's storage capacity. Optional Cargo Cleats or heavy-duty Slide-Track tie-downs allow items to easily attach to the deck.

Installation and removal is a quick and simple process requiring no tools and no assistance. DAMAR is putting together marketing material and dealer FAQ sheets to assist in product sales.
